The Brady Brief - Clean Energy Investments In Pennsylvania

Dear Friend,

Recently, the Department of Energy announced a number of Clean Energy investments in Pennsylvania under the American Recovery and Reinvestment Act. The Recovery Act is investing \$90 billion in clean energy nationwide, including \$1 billion in Pennsylvania, as part of President Obama's unprecedented commitment to rebuilding a strong, sustainable 21st century economy.

The Recovery Act investments in Pennsylvania are supporting a broad range of clean energy projects, from energy efficiency and the smart grid to wind and geothermal, hydro and biofuels. The following are just some of these important projects:

- The Commonwealth of Pennsylvania has received \$252.8 million to scale-up existing weatherization efforts in the state, creating jobs, reducing carbon emissions and saving money for Pennsylvania's low-income families
- The PA Department of Environmental Protection has received \$11.9 million to offer consumer rebates for purchasing certain ENERGY STAR® appliances
- PECO Energy Company in Philadelphia was awarded a Smart Grid Investment Grant for \$200 million. The funds will be used to deploy smart meters to the company's 600,000 customers and upgrade communications infrastructure on the state's electrical grid

I voted for the American Recovery and Reinvestment Act, and I believe these new investments are creating quality jobs today and positioning Pennsylvania to play an important role in the new energy economy of the future.

Sincerely,

Robert Brady
Member of Congress
